

Polyethylene **Borlink™ LS4201EHV** Crosslinkable Insulation Compound

Description

Borlink LS4201EHV is a crosslinkable natural polyethylene compound based on Supercure technology, specially designed for insulation of energy cables.

Applications

Borlink LS4201EHV is intended for insulation of XLPE extra high voltage (EHV) cables.

Specifications

Borlink LS4201EHV meets the applicable requirements as below when processed using sound extrusion practices and testing procedures

AEIC CS9
ANSI/ICEA 108-720

IEC 62067

Special Features

Borlink LS4201EHV is a ready-to-use natural compound, and the cleanliness level is assured through the Borealis quality control system. Borlink LS4201EHV provides superior electrical performance. It also offers excellent scorch resistance enabling long production runs. In addition, Borlink LS4201S is specially designed for high productivity due to a reduced degassing burden.

Physical Properties

Property	Typical Value	Test Method
Data should not be used for specification work		
Density (Base Resin)	922 kg/m ³	ISO 1183
Melt Flow Rate (190 °C/2,16 kg) ¹	2 g/10min	ISO 1133
Tensile Strain at Break (250 mm/min) ²	> 450 %	ISO 527
Tensile Strength (250 mm/min) ²	> 17 MPa	ISO 527
Change of Tensile Properties After Ageing (168 h, 135 °C) ²	< 25 %	IEC 60811-401
Hot Set Test (200 °C, 0,20 MPa)	Elongation under load Permanent deformation	75 % 5 %
MDR, max torque	2,9 - 3,8 dNm	ISO 6502
Scorch Time (t10)	> 1,0 min	ISO 6502
Methanol Wash ³	< 800 ppm	BTM 00118
Moisture	< 200 ppm	Karl Fischer-titration

¹ Base Resin

² Measured on crosslinked specimens

 Polyethylene
Borlink LS4201EHV**Electrical Properties**

Property	Typical Value	Test Method
Data should not be used for specification work		
Dielectric constant (50 Hz)	2,3	IEC 60250
DC Volume Resistivity	> 10 PΩcm	IEC 60093
Dielectric Strength (50 Hz)	> 40 kV/mm	IEC 60243
Dissipation Factor (50 Hz)	0,0003	IEC 60250

Processing Techniques

To produce a good and reliable cable, it is essential to ensure careful and very clean handling of the insulation material. Hence all material handling should preferably be conducted in closed systems and in clean room conditions. Please contact your Borealis representative for more details.

Extrusion

Melt temperature 125 - 135 °C

Packaging

Package: Octabins

Storage

Borlink LS4201EHV has a shelf life of 12 months from production date if stored in unopened original packages, under dry and clean conditions at temperatures between 10 - 30 °C (50 - 85 °F). The material could be stored (originally closed and in dry environment) at an ambient temperature up to 40°C for a certain period of time (6 months) without negative influence on the material quality. Before use, material shall be conditioned indoors (production room) at the ambient temperature.

More information on storage is found in our "Safety data sheet" / "Product safety information sheet" for this product.

Safety

Please see our "Safety data sheet" / "Product safety information sheet" for details on various aspects of safety of the product. For more information, contact your Borealis representative.
