

Low Density Polyethylene DLR 001A

Description:

DLR 001A is a low density polyethylene is obtained from **post-consumer** shink, having a concentration of **55% recycled material**. This product has a **transparent color**.

Applications:

Flexible packaging., Stretch Films

Processes:

Blown Film Extrusion, General extrusion.

Control Properties:

Feature	Method	Units	Values
Melt Flow Rate (190°C/2.16kg)	ASTM D 1238	g/10 min	0.55
Density	ASTM D 792	g/cm ³	0.93

Final Remarks:

1. Braskem informs this is a recycled product, which composition is not entirely known and may vary, as expected for recycled products. This product has not been tested by Braskem, being client's sole responsibility to verify the product's suitability for the intended use. Braskem is not responsible for any use of this product in discordance with the applicable legislation.
2. Recycled products are not fully regulated, until competent authorities define how such products shall be used, this product is not intended for medical and pharmaceutical applications, food contact, contact with drinking water and toys. Braskem does not make any warranties of merchantability or suitability of the product for a particular purpose or for a particular sector, sectors not mentioned above are not expressly or implicitly recommended.
