Aquathene CM04482

Description

Aquathene CM04482 is a catalyst masterbatch selected by customers for moisture cure applications. In addition to catalyst, CM04482 also contains antioxidants and metal deactivator. When melt blended at 5 wt% to *Aquathene* AQ120000, the resulting material is capable of crosslinking when exposed to moisture.

Availability

North America

Product Data and Technical Information

Typical Properties

Melt Flow Rate (190 °C/2.16 kg)	7.0 g/10 min
---------------------------------	--------------

Density (23 °C)	0.926 g/cm ³
-----------------	-------------------------

Process

Wire & Cable

Resin

W&C Polyolefin Compound

Applications

Shrink Film, Stretch Wrap Film, Wire & Cable
