Hostalen PP H2992

Description

Hostalen PP H2992

is a natural polypropylene copolymer with an exceptional mechanical properties balance. The product has been specifically designed for extrusion of pipes for underground drainage and sewage applications but can also be used for injection moulding and other extrusion processes. The product provides superior pipe stiffness while maintaining the good impact strenght requested for installations, both at room temperature and at sub-zero conditions.

Hostalen PP H2992 fulfills the material requirements according to EN 1852 and EN 13476 and can be classified as PP-HM (PP high modulus).

Hostalen PP H2992 is not intended for medical and pharmaceutical applications.
