NOVAPOL® LF-Y320 Series Resin

Homopolymer LDPE Film Resins

product data sheet

Grades

LF-Y320-A
LF-Y320-C
LF-Y320-D

Additive Packages

Base resin
Antiblock (3500 ppm)
Slip (500 ppm), Antiblock (4000 ppm)

Applications

Industrial packaging, liners, shrink film, blends with LLDPE
Industrial packaging, liners, shrink film, blends with LLDPE

Features

- High melt strength and superior bubble stability
- Enhances throughputs in LLDPE blends
- Superior strength and toughness
- Excellent shrink film characteristics

- (1) Properties designated have been determined using methods which are in accordance with, or substantially in accordance with, the specified testing standards.
 (2) Typical Values represent average laboratory values and are intended as guides only, not as specifications.
 (3) Condition 190°C/2.16 kg.
 (4) Film properties are typical of blown film extruded on a 1.5" extruder with 3" die and 35-mil die gap at a blow up ratio of 2.5:1, but are dependent upon operating conditions.
 (5) NOVA Chemicals test method.

PRODUCT DATA SHEET

NOVAPOL LF-Y320 Series Resin

Homopolymer LDPE Film Resins

Availability

NOVAPOL LF-Y320 Series polyethylene resins are available in bulk hopper cars, hopper trucks, boxes, sea bulk containers, or bags. The product type and batch number are clearly marked on each container. Contact the NOVA Chemicals sales office nearest you for availability in your area.

Storage/Handling

NOVAPOL LF-Y320 Series resin should be stored in a clean, dry place at ambient temperatures. Prolonged or improper storage can result in deterioration of product properties. Care should be taken when handling and transferring product to prevent foreign matter contamination. The NOVA Chemicals Safety Data Sheet (SDS) contains important safety information and should be reviewed before using the product.

Processing Conditions

Comprehensive assistance with processing conditions and technology is available from NOVA Chemicals Technical Service at (403) 291-8444.

Food Packaging Status

United States: NOVAPOL LF-Y320 Series resin complies with the specifications contained in the U.S. Food and Drug Administration (FDA) regulation 21 CFR 177.1520(c) for olefin polymers. For details, please contact your NOVA Chemicals Technical Service Specialist.

Environmental

NOVA Chemicals polyethylene resins are biologically and chemically inert, but improper disposal may present an ingestion hazard to wildlife. Where recycling of NOVA Chemicals' polyethylene resins is not possible, disposal to landfill or incineration in accordance with all applicable government laws and regulations is recommended. Please contact NOVA Chemicals Technical Service for further information on recycling and disposal of NOVA Chemicals resins.

is the SPI resin code developed for low density and linear low density polyethylene to identify material type for sorting and recycling purposes.
